FRANK PEIRCE,

Sole Agent for

"Shultz's" Raw-Hide Belting, Lace and Picker Leather,

No. 128 PEARL STREET, BOSTON, MASS.

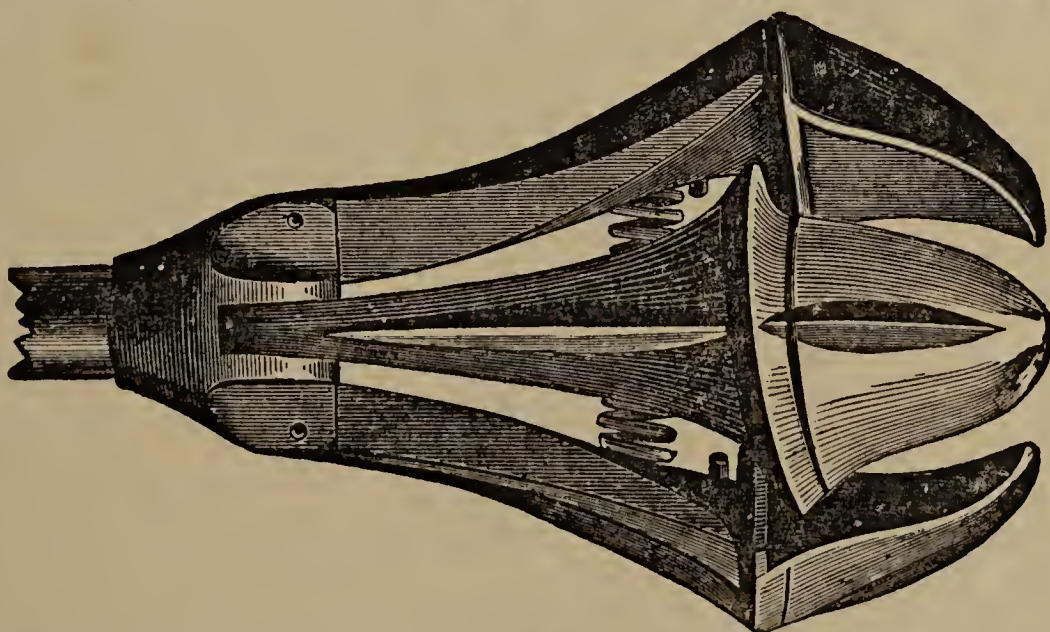

For Race, Mule, Stripper, Card, Counter, Speeder, Cone, Winder and Driving Belts, in fact, for
HARD PLACES it is acknowledged to be the BEST in use.

This belting is tanned only on the Surfaces, retaining all the strength of the Raw-Hide, and, by a new Patented Process of Fulling, is made perfectly pliable. It does not get hard. It does not tear out at the lace-holes or rivets. It stretches less than any other belt. It hugs the pulley better, and displaces one third more power than any other belt. There is no acid, alkali, salt or astringent used in its manufacture; the process is entirely mechanical. In competitive tests with all the leading Oak Tanned Belts, it has severed them with only one half their width. The Lace-Leather is made of Raw Hide, without any Tanning, and is stronger and will wear longer than any other Lace-Leather in the market.

THE FOLLOWING WELL-KNOWN MANUFACTURERS HAVE THIS BELTING IN USE.

THE CURTIS REGULATOR CO.

NELSON CURTIS - - - - - AGENT,
MANUFACTURERS OF

STEAM AND WATER PRESSURE REGULATORS, STEAM TRAPS,

And Other Specialties for Steam Heating.

OFFICE AND MANUFACTORY, 59 BEVERLY STREET, BOSTON, MASS.

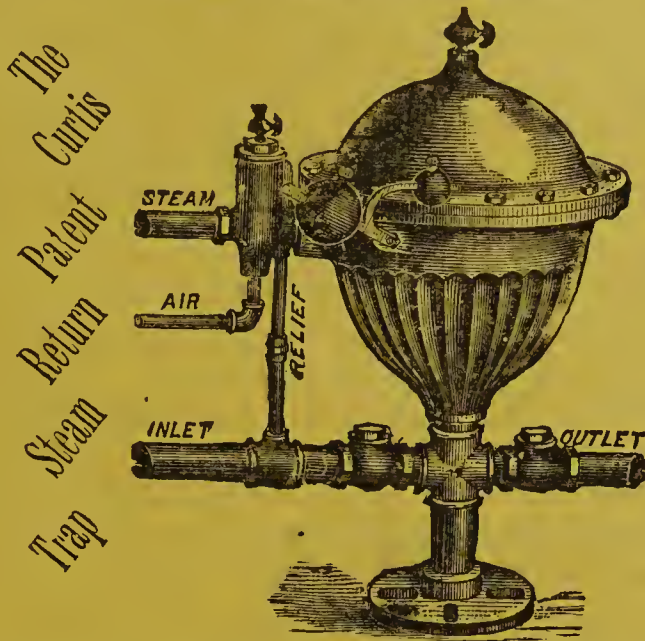

- NO. 1, FIFTY HORSE POWER, \$50.00
- NO. 2, ONE HUNDRED HORSE POWER, 70.00
- NO. 3, TWO HUNDRED HORSE POWER, 100.00

LARGER SIZES ON APPLICATION.

It is the most simple, it is the most durable, it is the most stylish, and will keep the boiler pressure within two pounds.

GENERAL AGENCIES.

No. 109 Liberty Street, New York; No. 19 North 7th Street, Philadelphia; No. 204 Lake Street Chicago; No. 49 Holiday Street, Baltimore; No. 24 Sixth Street, Pittsburgh; No. 707 Market Street, St. Louis; No. 745 Craig Street, Montreal.

Automatically returns the water of condensation from any surface into the boiler. It will return the water from low pressure circulation into a high pressure boiler. It is noiseless, positive, simple and cheap.

THE CURTIS Pressure Regulator For Steam and Water

The Lock-up Attachment Three Dollars Extra.

This valve contains a novel combination of old and established principles; is made entirely of metal; occupies the same space as a globe valve, for the same size pipe, is a lock valve, is very simple and sensitive.

It has no glands or packing; and the seat may be made of any suitable material for steam, water, or any other gas or fluid.

It is used on Steam Heating Apparatus, Dryers, Slashers, Jacket Kettles of all kinds, Air and Water Pumps, etc., and in fact, everywhere that air, steam, or water needs to be controlled automatically.

WHAT WE CLAIM FOR IT.

1. It will fully control the outlet valve on a change of temperature of 5°.
2. The outlet valve has an area nearly equal to the area of the connecting pipes.
3. It will discharge air as freely as water, and remove large quantities of air as fast as the steam will displace it.
4. Any trap will work from 1 to 100 lbs. pressure.
5. It is small, simple, durable, and accessible.
